

As an industry leader, *DistributionNOW (DNO) Canada Process Solutions* is focused on providing the best in complete solutions for a wide range of markets. We partner with our customers from initial design and fabrication of production skid packages; to individual rotating and process equipment sales, rentals, lease-to-own and rebuilt equipment exchange options; to comprehensive 24/7 in-shop and field service. With worldwide reach and resources, *DNO Canada Process Solutions* is truly your "one-stop solution" for rotating, process and valve equipment engineering, design, installation, fabrication, distribution and service.

***DistributionNOW Canada Process Solutions* is comprised of 7 core offerings, allowing us to offer complete solution packages and services to a variety of markets and customers:**

Engineering & Design

Highly-trained engineers and state-of-the-art software

Production Equipment

Custom production package design, fabrication and installation

Total Valve Solutions

Complete valve actuation, modification and repair solutions

Surface Pump Equipment

Large selection of high-quality pump solutions, parts and accessories

Prime Mover Equipment for Artificial Lift

A diverse inventory of engines, motors, pumping units, gen-sets, and VFD's

Customer Managed Inventory

Comprehensive management options for your equipment inventory

Service & Repair

Highly-qualified in-shop and field service technicians and equipment

CORE OFFERINGS

Engineering & Design

DNO Canada Process Solutions employs highly-qualified engineers and draftsman who utilize state-of-the-art software to complete nearly any custom design project for your operation. We are more than just fabrication; our experts and technology are focused on the quick realization and management of your project goals.

Capabilities

- 2D & 3D Design
- Coatings
- Drafting
- Handheld 3D Scanning
- Piping Stress Analysis
- Virtual Reality (VR) Walk-Through
- X-Ray

Software

- AutoCAD
- CADWorx
- Solidworks
- NavisWorks

Certifications

- APEGA
- CWB
- ISO 9001

Production Equipment

DNO Canada Process Solutions (in conjunction with DistributionNOW companies Power Service and Odessa Pumps), has over 650,000 sq.ft. of fabrication facilities, allowing us to build and assemble almost any system imaginable. In combination with our engineering & design and installation capabilities, we can truly offer you a "one-stop solution" for your production equipment package needs.

Expert production equipment engineering and fabrication

- 3-Phase & 2-Phase Separators
- ASME Vessels (U&R stamp)
- Co-Gen Packages
- Gas Measurement Packages
- Lease Automatic Custody Transfer (LACT)
- Pump Skid Packages
- Solar Packages
- Vapor Recovery Unit (VRU)
- Salt Water Disposal (SWD) & Water Flood
- Water Transfer

Total Valve Solutions

DNOW Canada Process Solutions is focused on being your "one-stop solution", and Total Valve Solutions (TVS) is a perfect example of this. From quality OEM and aftermarket valves, to our highly-trained field service technicians, we pride ourselves on offering a wide range of products and services.

Actuation

Total Valve Solutions offers comprehensive actuation for almost any application. From electric, to pneumatic, to direct gas and hydraulic, we can customize an automated system to fit your needs.

Modification

When your application requires specialty valves and timely delivery, TVS is the answer. We provide a large range of high-quality valve modification, including in-house machining, fabrication and testing.

Repair

TVS provides extensive on-site field service and repair options on top of our standard in-shop capabilities. Plus, you don't have to worry about shipping and handling concerns; we come directly to you!

Valve Depot

TVS Valve Depot is our turn-key valve recertification program, with convenient pick-up and drop-off options at your local DNOW store. Your valves are shipped to us for repair and hydro-testing and returned via a cost effective logistics process.

Surface Pump Equipment

DNOW Canada Process Solutions has earned the reputation as being "Your Pump House" by providing complete pumping systems, custom fabrication, pump packages, parts, accessories, training, commissioning, machining and service. We can serve the pumping needs of the oil & gas industry, to keeping the water flowing for the cities and towns we call home. Plus, all of our pumps are available through purchase, rental, lease-to-own and our exchange program. We truly are your full-service pump company.

	Screw - Twin & Triple	Vertical Turbine	Mixers
			Pulsation Dampeners

Prime Mover Equipment for Artificial Lift

(Engines, Motors, Pumping Units, Gen-Sets, VFD's)

With over 500 years of combined experience, *DNOW Canada Process Solutions* is the right choice for your artificial lift prime mover equipment, parts and accessory needs. We boast one of Canada's largest and most diverse inventories of engines, motors, pumping units, gen-sets and VFD's. As with all of our products, we offer purchase, rental, lease-to-own and exchange options. At *DNOW Canada Process Solutions*, it's more than just supplying you with the right prime mover equipment and parts, it's about finding the complete solution that works best for you.

BRANDS			
ELECTRIC MOTORS	ENGINES	GENERATORS	PUMP JACKS
Brook Crompton	Arrow	Arrow	DPEG
TB Woods	General Motors	SRC Power Systems	
TECO-Westinghouse	Ford	Capstone	
	SRC Power Systems		

TYPES			
ELECTRIC MOTORS	ENGINES	GENERATORS	PUMP JACKS
5HP - 500HP	Single Cylinder	Propane / NG	Model 80 - C1280
Sheaves and Bushings	Multi Cylinder	28kw - 200kw	
Belts	Propane / NG / Sour Gas / Bio-Fuel	ULE - Ultra Low Emission	
	Flare Gas / Diesel	Microturbine 30kw - 30MW	

Ultra-low emission microturbine quad-phase power generators

Our ultra-low emission (ULE) microturbines are the ideal solution for today's focus on environmental stewardship. They efficiently utilize the waste gases from landfills, food and solid waste, wastewater treatment and chemical processes for quad-generation, generating electricity as well as useful heat and cooling for your process applications.

Through a national channel partnership with Capstone Turbine Corporation, the leading clean technology manufacturer of microturbine energy systems, *DNOW Canada Process Solutions* is transforming the way businesses think about distributed energy.

Customer Managed Inventory

With our Customer Managed Inventory program (CMI), we can manage your new and used equipment, parts and accessories at one of our facilities. So, when you need access to your equipment, we are just a phone call away and offer quick delivery times. If you discover you need items which are not in your inventory, we can offer brand-new products as well as used products through our large inventory network and rebuilt equipment exchange programs.

In addition, we can refurbish much of your used inventory. Our highly-skilled technicians can remanufacture almost any piece of equipment back to OEM specifications, offering substantial savings over purchasing new. We see it as making a one-time purchase a lifetime asset. At *DistributionNOW Canada Process Solutions*, we offer more than just single item fixes, we offer full inventory solutions.

Service & Repair

At each of our full-service locations, we offer 365/24/7 service and repair, using OEM parts, for most major brands of engines, gen sets, pumps, pump jacks, valves, seals, compressors and more. We can offer a wide range of features and services including:

- In-shop and field service capabilities
- Highly-qualified technicians
- Large fleet of certified service trucks
- Warranty service on represented brands
- Prescheduled maintenance plans
- On-site commissioning
- Electronic tracking
- Installation and removal
- Emission testing
- Pressure testing and repair

MARKETS WE SERVE

Industrial / Oil & Gas (Onshore & Offshore)

- Salt Water Disposal (SWD) / Water Flood
- Water Transfer
- Crude Oil Pipelines Pump Package
- Custom Engineered Turnkey Packages
- Chemical Injection
- Lease Automatic Custody Transfer (LACT)
- Vapor Recovery Unit (VRU)
- Fabricated Vessel Packages
- Solar Packages

Machine and Repair

- Plunger Pump Fluid End
- Horizontal Multi State
- Vertical Turbines
- Power Ends
- End Suction

Pulp & Paper

- Water Plant
- Booster Stations
- Waster

Marine, Shipbuilding, Military Mining

...and many more.

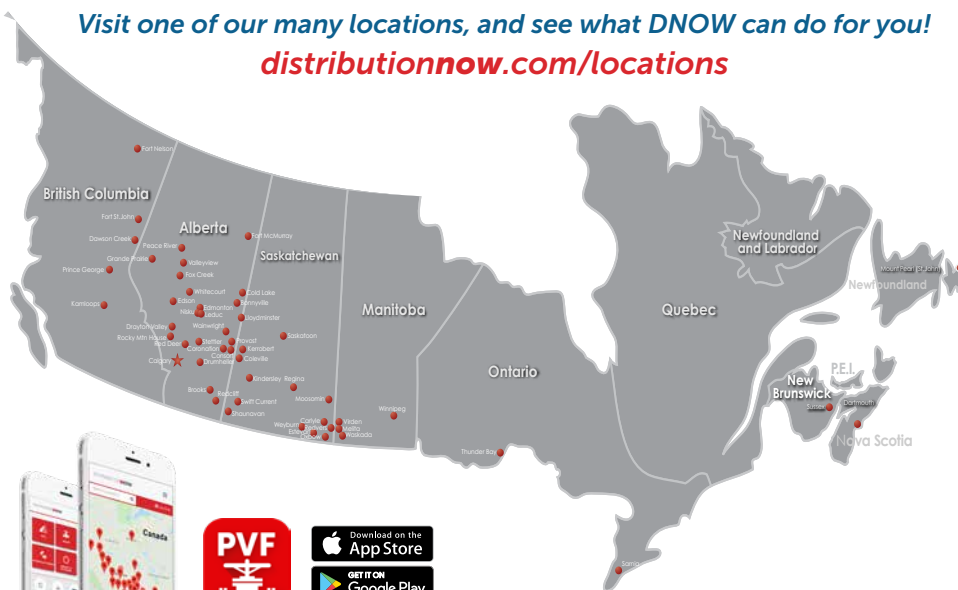

Municipal

- Water Plant
- Booster Stations
- Waste Water Plant
- Lift Station
- Controls

DistributionNOW Canada | At-A-Glance

PROCESS SOLUTIONS

- Provides rotating and process equipment solutions in the form of engineering, design, installation, fabrication and service
- Meets demand for turnkey tank battery production (facilities) solution

ENERGY CENTERS

- Branch network model supplying products from local locations to upstream and midstream energy customers
- Provides one-stop shop value proposition in major oil and gas regions

SUPPLY CHAIN SERVICES

- On-site model offering customizable products to upstream and downstream energy, industrial and manufacturing markets
- Reduces customer's total costs including operational and invested capital
