

# MOBILEZERO

## Portable Flaring and Emissions Control Solution

### What MobileZero Does:

- Treats low pressure gas for H<sub>2</sub>S and oxygen so the gas can be captured and sold instead of flared
- Fast mobilization and de-mob with only four piping connections + 480V power connection by electrician

### MobileZero Benefits:

- Eliminates flaring and venting during common oilfield operations
- Converts a waste stream into revenue
- Improves site safety profile
- Helps maintain net-zero emissions status 24/7

Contact us today to learn how MobileZero can help you achieve net-zero 24/7.

### Temporary Gas Treating Capacity for Routine Oilfield Operations

Put Gas Treating Capacity Where and When You Need It

EcoVapor's MobileZero™ is a trailer-mounted gas treating solution that helps you eliminate flaring and emissions associated with routine oilfield operations, including:

- Tank cleaning
- Treat low pressure vapor during flowback
- Well testing

MobileZero trailer units are equipped with a ZerO2™ E300 oxygen treating unit, a Sulfur Sentinel™ H<sub>2</sub>S removal unit and a two-phase scrubber.

In standard configuration, MobileZero units have capacity to treat approximately 300 MSCFD of low-pressure vapor.
