

# OptiWatch

## Real-Time Monitoring and Optimization Program for Horizontal Pumping Systems

Get the most from your pumps with OptiWatch high-quality hybrid pump system monitoring from the pump experts at Flex Flow, a DistributionNOW Company. OptiWatch offers detailed system monitoring capabilities with real-time response and asset lifecycle management tools that help you focus on your operations, minimize equipment problems and maximize profits.

### PROACTIVE

Algorithms grade performance, allowing for failure prevention and optimization

### REAL-TIME

Data pulled by the second versus being uploaded hours or days later

### MANAGED

Single-source tracking for inventory, service, geo, maintenance and more

### OptiWatch Capabilities

- Dashboard of overall system health and status
- Equipment inventory tracking
- Advanced trend mapping across a range of parameters
- Carbon footprint and power cost analysis
- Interpretative algorithms
- Self-plotting pump curves
- Maintenance program scheduling
- Daily pump status and reports
