

## Why choose a Diesel Driven Standby Pump?

- Peace of mind when the main pump operation is interrupted
- In the event of electrical failure, diesel driven standby pump will be switched on automatically as an option
- Trailer mounted units for ease of movement at any desired location within your facility
- Mechanically sealed pumps with dry running technology as a standard
- Auto Start / Stop with floats or transducers, no outside power required
- Avoid potential sewage spills by having a diesel driven standby pump
- Both Ready Prime and Prime Assisted pumps available
- Solids handling up to 3"
- Built in fuel tanks with 12+ hour full load run capability. 500 Gal. reserve fuel tanks available as an option
