

# TOTAL VALVE SOLUTIONS

## VALVE DEPOT

DistributionNOW Valve Depot enables you to have any valves picked up or dropped off at your local DNOW store and shipped to Casper, WY for repair, hydro-test, and returned via a cost effective logistics process. Centralized repair offers consistency, and the ability to leverage enhanced repair capability and revitalize current dead and slow moving valve inventories for redeployment.

### VALVE DEPOT CUSTOMER PROCESS

### WHAT HAPPENS WHEN YOUR VALVE ARRIVES FOR REPAIR AT OUR FACILITY?

1. We record, tag and report all information on incoming documents
  - We follow a strict quality control process from start to finish
2. We check for damages and create a work order
3. The valve is completely disassembled
4. All metal parts go into a dip tank to strip all petroleum products and paint off of and out of the valve
5. Valve is flushed, cleaned and inspected
6. You will receive an estimate for the repair
7. After estimate approval, any damaged parts are discarded and replaced, all soft goods are replaced
8. Valve is reassembled and hydro-tested, you will receive the complete report
9. Once passed, the valve is cleaned, prepped, painted (as per customer specifications), greased and packaged for shipping
  - If the valve fails the hydro-test, we move back to step 3

### WHAT YOU'LL BE GETTING IN YOUR HYDRO-TEST PACKAGE:

- DNOW packing slip
- API inspection and test report
- Hydro-test report
- Test graphs for each test performed
