

MASTER CORPORATION

Engineers and Constructors

Master Corporation provides engineering, design, drafting, procurement, and construction services, utilizing an expert staff and modern equipment fleet. We have an extensive and diverse history of projects and a dynamic team that can take on complex applications to solve the problems of our customers and industries. With the resources of DistributionNOW and the Process Solutions team, customers can expect better service and a wider range of capabilities, at lower costs.

INDUSTRIES SERVED

- Oil and gas production
- Midstream gathering, pipeline and terminals
- Water management
- General industry and mining

SERVICES PROVIDED

Engineering, Procurement and Construction (EPC)

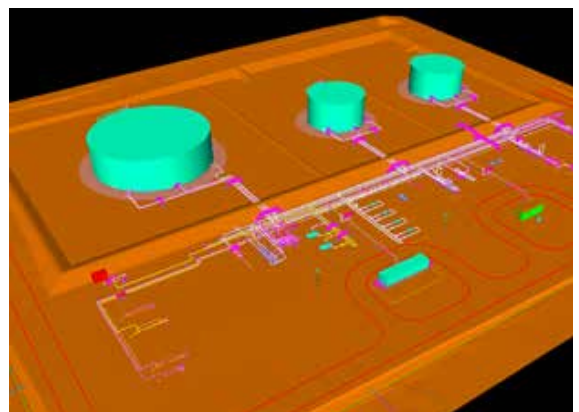

- Feasibility studies and budgetary estimates
- Process design and hydraulic model development
- Site development
- Project management services
- Engineering deliverables
- Procurement services
- In-house construction and completion of projects

Construction Services

- Construction service to build a current design
- Civil, mechanical and electrical services
- Project supervision or management
- Grading and foundation capabilities
- Fabrication and installation
- Modular shop fabrication available

Engineering Services

- Process design
- Process safety management / HAZOP
- Drawing and change management
- Engineering and design software (ProMax, HYSYS, STAAD.Pro, PipelineStudio, SKM)
- PI&D and layout modeling (2D and 3D plans with AutoCAD and CADWorx)
- Deliverables (material take-offs, piping BOM, equipment lists)
- Electrical design, drawings, plans and modeling
- Construction bid documents

MASTER CORPORATION

Engineers and Constructors

TURNKEY ENGINEERING TO CONSTRUCTION

Master Corporation provides turnkey solutions, from project conceptualization through design, engineering, procurement, construction and startup. Don't let separate engineering, procurement and construction services delay your capital projects – working with us has significant advantages:

Responsibility is clear.	Cost savings are realized.	Turnkey projects save time.
With our comprehensive solution, there is a smooth flow from design, through procurement, to construction. Finger-pointing between engineering and construction firms is eliminated.	Minimizing or eliminating the resources required for the competitive bid process (preparation, evaluation, site investigations) saves valuable time and money.	Developing drawings and starting that phase of construction immediately without waiting for the entire design can accelerate project completion by weeks or months.

COMPLETED PROJECTS

- Well pad layout and design
- Midstream and refined product terminals and pipelines
- Turnkey saltwater disposal (SWD)
- Acid gas disposal systems (carbon capture)
- Infrastructure design
- Gas processing and hydrocarbon stabilization
- Processing facility expansion
- Complete pipeline design
